

A high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics. Science has changed our lives and is vital to the world's future prosperity, and all pupils should be taught essential aspects of the knowledge, methods, processes and uses of science. Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena. They should be encouraged to understand how science can be used to explain what is occurring, predict how things will behave, and analyse causes.

	<i>By the end of Reception</i>	<i>By the end of Year 2</i>	<i>By the end of Year 4</i>	<i>By the end of Year 6</i>
<b>To work Scientifically</b>	<p><i>Look closely at similarities, differences, patterns and change</i></p>	<p><i>Ask simple questions</i>  <i>Know how to use simple equipment</i>  <i>Know how to observe closely</i>  <i>Understand how to perform simple tests</i>  <i>Know how to identify and classify Use observations and ideas to suggest answers to questions</i>  <i>Know how to gather and record data to help answer questions</i></p>	<p><i>Ask relevant questions</i>  <i>To know how to set up simple practical enquiries and comparative and fair tests To know how to make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers.</i>  <i>To know how to gather, record, classify and present data in a variety of ways to help in answering questions.</i>  <i>Record findings using simple scientific language, drawings, labelled diagrams, bar charts and tables.</i>  <i>Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions. Know how to use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests.</i>  <i>Knows how to identify differences, similarities or changes related to simple, scientific ideas and processes.</i>  <i>Understands how to use straightforward, scientific evidence to answer questions or to support their findings</i></p>	<p><i>Plan enquiries, including recognising and controlling variables where necessary. Knows how to use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.</i>  <i>Knows how to take measurements, using a range of scientific equipment, with increasing accuracy and precision.</i>  <i>Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models.</i>  <i>Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.</i>  <i>Present findings in written form, displays and other presentations. Use test results to make predictions to set up further comparative and fair tests.</i>  <i>Know how to use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.</i></p>

	<p>Children should know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p>	<p><b><u>To understand plants</u></b></p> <p>Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. Identify and describe the basic structure of a variety of common flowering plants (seeds, roots etc), including trees.</p>	<p><b><u>To understand plants</u></b></p> <p>To observe and know how seeds and bulbs grow into mature plants To find out and describe how plants need water, light and suitable temperature to grow and stay healthy</p>	<p><b><u>To understand plants</u></b></p> <p>Identify, know and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers Explore and know the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant Investigate and understand the way in which water is transported within plants Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.</p>			
--	---	--	--	--	--	--	--

		<p><b><u>To understand animals and humans</u></b></p> <p>identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals  identify and name a variety of common animals that are carnivores, herbivores and omnivores  describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)  Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</p>	<p><b><u>To understand animals and humans</u></b></p> <p>To know that animals, including humans, have offspring which grow into adults  To know and describe the basic needs of animals, including humans, for survival (water, food and air)  Know and describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.</p>	<p><b><u>To understand animals, including humans</u></b></p> <p>To identify and know that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat  Identify and know that humans and some animals have skeletons and muscles for support, protection and movement</p>	<p><b><u>To understand animals and humans</u></b></p> <p>Describe the simple functions of the basic parts of the digestive system in humans.  Identify the different types of teeth in humans and their simple functions.  Construct and interpret a variety of food chains, identifying producers, predators and prey.</p>	<p><b><u>Animals, including humans</u></b></p> <p>To describe the changes as humans develop to old age</p>	<p><b><u>Animals, including humans</u></b></p> <p>identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood</p> <p>recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function</p> <p>describe the ways in which nutrients and water are transported within animals, including humans.</p>

		<p><b><u>To understand seasonal changes</u></b></p> <p>Observe and talk about changes across the four seasons Observe and describe weather associated with the seasons and how day length varies, including understanding that it is unsafe to look directly at the Sun.</p>		<p><b><u>To investigate light</u></b></p> <p>Recognise that they need light in order to see things and that</p>	<p><b><u>To investigate sound and hearing</u></b> Identify how sounds are made, associating some of them with something vibrating. Recognise that vibrations from sounds travel through a medium to the ear. Find patterns between pitch of a sound and features of the object that produced it. Find patterns between the volume of a sound and the strength of the vibrations that produced it. Recognise that sounds get fainter as the distance from the sound's source increases.</p>	<p><b><u>Earth and space</u></b></p> <p>Describe the movement of the Earth, and other planets, relative to the Sun in the solar system</p> <p>Describe the movement of the Moon relative to the Earth</p> <p>Describe the Sun, Earth and Moon as approximately spherical bodies</p> <p>Use the idea of the Earth's rotation to explain day and night, and the apparent movement of the sun across the sky.</p>	<p><b><u>Light</u></b></p> <p>recognise that light appears to travel in straight lines</p>
--	--	--	--	---	--	--	--

				<p>dark is absence of light</p> <p>Notice that light is reflected from surfaces</p> <p>Recognise that light from the sun can be dangerous and that there are ways to protect the eyes.</p> <p>Recognise that shadows are formed when light from a light source is blocked by a solid object</p> <p>Find patterns in the way that the size of shadows change</p>			<p>use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye</p> <p>explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes</p> <p>use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them</p> <p><b><u>Electricity</u></b></p> <p>associate the brightness of a lamp or the volume of a buzzer with the number and voltage</p>
					<p><b><u>To understand electrical circuits</u></b></p> <p>Identify common appliances that run on electricity</p> <p>Construct a simple series electrical circuit, identifying</p>		

				<p>and naming its basic parts, including cells, wires, bulbs, switches and buzzers. Identify whether or not a lamp will light in a simple series circuit based on whether or not the lamp is part of a complete loop with a battery. Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. Recognise some common conductors and insulators and associate metals with being good conductors.</p> <p><b><u>Forces and magnets</u></b></p> <p>compare how things move on different surfaces</p>	<p>of cells used in the circuit</p> <p>compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches</p> <p>use recognised symbols when representing a simple circuit in a diagram.</p> <p><b><u>Forces and Magnets</u></b></p> <p>explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p>
--	--	--	--	--	---

				notice that some forces need contact between 2 objects,			
				<p>but magnetic forces can act at a distance</p> <p>observe how magnets attract or repel each other and attract some materials and not others</p> <p>compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials</p> <p>describe magnets as having 2 pole</p> <p>Predict whether 2 magnets will attract or repel each other, depending on which poles are facing.</p>		<p>identify the effects of air resistance, water resistance and friction, that act between moving surfaces</p> <p>recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect</p>
